OPTION INDICES

With respect to the Units to be added to the Condominium by amendment, the following optional Construction Items may be added to any of them.

Such option will not materially affect the structure or configuration of any such Unit, but each will increase the Fair Value Ratio Index of such Unit as follows:

Option	Option Index
Garage (included at no increase in index for Bluff phase)	.035
Full Basement	.035

Such increase of the Fair Value Ratio Index will be indicated in the Amended Master Deed filed

-continued-

SCHEDULE A (continued)

at the time such Unit is added to the Condominium.

Any of the above Unit models, described in detail on the Plans recorded with this Master Deed, may be placed at any of the approximate locations shown on the Site Plan also filed herewith.

Explanatory Note

As Units are added by Sponsor, the fair value ratio index of each Unit may be determined by multiplying the Unit Model Index of the Unit by the location factor attributable to it and then adding the option index for any applicable option. For example, a Ranch Cape in the "Knoll" with full basement would have a fair value ratio index of Unit Model Index (1.000) X Location Factor (.55) + Option Index (.035) = .585. A table of Unit Model indices, location factors and option indices for all possible subsequent Units of the Condominium is set forth on the preceding page. The proportionate interests of all Units may then be calculated by dividing the fair value ratio index of each such Unit by the sum of the fair value ratio indices of all Units which will then have been built and added to the Condominium by Sponsor.
